25X1C

On 1951, Welzow airfield was observed from its northern and northeastern edges. The low wooden buildings just west of the road leading from triangulation point 120.4 toward triangulation point 119.2 were vacant. A small portion of the new low wooden buildings just northeast of the reported hangar was probably occupied by a guard detail. * The hangar was about 7 x 60 meters and covered with roofing paper. No grading work was observed at the field. The dumpcars and rails were shipped away. No worker was seen on the day of observation which was a Sunday. **

25X1A * Comment. For triangulation points, see map G S G S, sheet 4450. The pin-point location of the hangar was previously reported. See paragraph 4 of

25X1A ** Comment. The report indicates that construction at the field was completed.
